

Inundated with office enquiries

OFFICE space is being snapped up fast at Bayside City Plaza.

With about a dozen available, project leasing manager David Turner has been inundated with enquiries about the prime space.

"I'm not aware of a roll out of brand new office space this size in the CBD in the last 30 years," Mr Turner said.

There is about 1500-square-metres available for office space and offices can be tailor made to cater to a business' needs.

Young's 10X was the first business to take advantage of the great location.

This cutting edge accounting firm is offering a complete service to businesses in the Western District to facilitate future growth.

"Young's 10X proactively looks at the five following key areas by addressing Growth — how to grow the business; Profits — how to increase profits; Cashflow — how to ensure the profit ends up in the bank; Asset Protection and Succession Planning," owner Cameron Young said.

Young's 10X, which has eight

team members, offers regular 'The Edge Event' seminars advising business owners how to maximize their potential.

Businesses who have utilized the firm's services have posted greater profits and improved their efficiency, Mr Young said.

Young's 10X also has a coaching club which facilitates long-term relationships with businesses keen to improve profits, revenues and quality of life.

"My role as your 10X coach is simple," Mr Young said. "It is, absolutely and without question, to have you win. More specifically, have you produce results beyond what you thought possible for your business and quality of life. To do that I provide a fresh set of eyes, expand your knowledge via my own experience and with our unique 10X tools, to inspire you to reach your goals, just as an Olympic coach does for their athletes." Mr Young said he was delighted to have a new office in the Bayside City Plaza.

He said it was ideal for the business with its proximity to the CBD and businesses.
